Notes:
1. Place right of way markers at each angle point in a right of way line, where the right of way parallels the center line of the highway. If the markers are placed on each right of way line, opposite PS, SC, CS and ST or opposite the FC and PT.
2. Right of way markers shall be placed in addition so that no interval will exceed 50 ft. Preferably, these intermediate markers should be on section lines or intersecting property lines.
3. All exposed surfaces of the bronze cap are to be ground to a smooth surface.
4. All letters are to be depressed a minimum of 2 mm.
5. Use 5 mm high lettering and figures.
6. Use alternate "A" installation when placing top of bronze cap flush with hard surface area.
7. Use alternate "B" installation when placing markers in heavy brush or forest lands.
